

Obtaining a Product Registration with the EPA for a substantially similar product to one already being sold in the market

Contract Development

- Define the following tasks, anticipated timelines and estimated costs.
- Develop Registration Plan

Formulation Development

- Development and preparation of prototypes
- Write an analytical method
- Feasibility Study
- Accelerated Stability Study

GLP Chemistry Studies

- Method Validation
- Product Chemistry (upon formula determination)
- Stability and Characterization Study

Efficacy Studies

- Cite previously submitted studies in the registration packet
- Send out offer to pay letter.

Acute Toxicology Study

- Cite previously submitted studies in the registration packet
- Send out offer to pay letter.

Target Animal GLP Safety Study

- Cite previously submitted studies in the registration packet
- Send out offer to pay letter.

Product Container Design

- Submit to every state for approval.

Ambient 12-Month Product Stability and Container Evaluation

- GLP study in final market packaging.

Development of Product Support and Manufacturing Specifications

- Increase the manufacturing efficiency and address any concerns the client may have.
